-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

~~2.~~ ^{7.} Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kissel (U.S. 5,350,344). Referring to claim 1, Kissel discloses an incremental weight stack having a plurality of incremental weights, each of the incremental weights defining a slot, a selector plate (6) having a number of pins (31) equal to the number of incremental weights, with each pin corresponding to one of the weights, each of the pins positioned on the selector plate to uniquely engage the slot of the corresponding incremental weights, the selector plate being proximate and adjacent the incremental weights to that the pins may selectably engage the slots and the selector plate being positionable so as to selectably and uniquely engage one or more of the incremental weights. Referring to claim 7, as broadly claimed, Kissel discloses weights supported by a stand. Referring to claim 8, Kissel discloses the selector plate positionable, (as best understood) so that it does not engage the incremental weight stack with any of the pins.

Allowable Subject Matter

Art Unit: 3764

3. Claims 9-10 are allowed. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record fails to teach in an incremental weight stack system, a selector plate having a plurality of pins varying in radial distance on the selector plate, with each pin corresponding to unique weight member in the weight stack.
